GFNorte reports Net Income of Ps 8.91 billion during 3Q20, 1% higher than 3Q19 and 37% above 2Q20.

(BMV: GFNORTEO; OTCQX: GBOOY; Latibex: XNOR)

The most relevant results for the period ended on September 30th, 2020 were:

- This quarter was still immersed in the quarantine caused by the COVID-19 pandemic; meanwhile, support programs came to an end for 64% of the enrolled clients. In Mexico, there has been a moderate recovery with improved levels of unemployment vs. 2Q20. **Net income** for the **third quarter** was **Ps 8.91 billion, up 37% sequentially** and 1% higher vs. 3Q19.
- **630 thousand clients benefited** from the consumer and SME support programs, out of which 64% have already concluded their program and 91% of them are paying regularly. Therefore, **provisions were down (63%)** versus the previous quarter, reflecting a **1.6% cost of risk**, down from 4.2% in 2Q20.
- Overall, the operating performance of the business was resilient despite the social distancing measures and the low interest rate environment. **Net interest income was stable sequentially and 2% higher when compared to 3Q19.** **Group's NIM** declined (18bps) vs. 2Q20, reaching 5.1% due to a 3% increase in average productive assets. **NIM of the Bank, stood at 5.8%** for the quarter and at 6.0% for 9M20.
- **Net fees increased 1%** compared to the previous quarter and **non-interest income declined (17%) on normalized trading income.** **Non-interest expense was practically unchanged** vs. 3Q19, in line with the annual expense guidance. **ROE** for the quarter improved substantially to **16.9%** from 13.0%, while **ROA** stood at **2.0%** up from 1.5% in the previous quarter.
- **Net income** for **9M20** totaled **Ps 24.54 billion, (11%) below** 3Q19. However, adjusting for the anticipated provisions in 2Q20 and for the extraordinary income from the liquidation of Banorte USA in 1Q19, recurring net income **grew 6%**.
- **Net interest income for 9M20 increased 5%** annually despite the decline to 4.25% from 8.25% of Banxico's benchmark rates during most of 9M19. **NIM declined only (17 bps)** reaching **5.45%**, driven by an 8% increase in average productive assets. **Total income** increased 1% and **expenses rose 4%, the latter in line with the commitment to grow between 4.0% and 4.8% for the year.** **Accumulated efficiency ratio** reached **39.8%**.
- **ROE** and **ROA** for 9M20 reached **16.2%** and **1.9%**, respectively. Both ratios were clearly impacted by the anticipated provisions in 2Q20. ROE was further impacted by the dividend sitting at the group's level, as we continue to follow the government's ongoing recommendation not to distribute dividends.
- Non-banking **subsidiaries** contributed positively to the group's performance. During 9M20, net profit of the Brokerage business grew 39%, Mutual Funds 7%, Insurance 6%, Annuities 38%, and Afore 12%.
- **Consumer loans** were up **6%** annually, showing growth across all segments except for credit cards, as expected. This was mainly driven by a moderate economic recovery in the country, and further supported by the positive effect of **support programs**, which have not yet concluded for a third of the enrolled clients. **Commercial loans** grew **1%** and **corporate** loans declined **(2%)** sequentially, while government loans were flat. Compared to 3Q19, **commercial and corporate portfolios increased 12% and 18% respectively**, and **government was up 3%**. Overall, **total loan portfolio** grew **1% quarterly, and 9% annually**; excluding government loans, the **loan portfolio was up 11% y/y**.
- The non-performing portfolio declined (28%) driven by the effect of the support programs for individuals and SMEs, as well as by the liquidity lines for commercial and corporate businesses. Consequently, the **NPL ratio fell to 0.8% from 1.2%**, and the **coverage ratio** reached **265%** from 201%. NPL and coverage ratios are temporarily restrained by the ongoing support programs; however, the preliminary results from customers coming out of their programs allow us to leave our **provisions and write-offs estimates unchanged vs. 2Q20, maintaining a solid balance sheet**.
- **Core Deposits increased 3%** during the quarter: **demand deposits grew 6%**; whereas, **time deposits were down (2%)**. Compared to 3Q19, demand deposits were up 27%, and time deposits declined (7%), totaling **14% annual growth** in Core Deposits.
- **Capital preservation, as well as adequate liquidity management** have been top priorities for the Financial Group during this challenging period. As a result, the **bank's total capital ratio** reached **21.1%** from **19.7%**; **Core Equity Tier 1 (CET1)** reached **13.7%**, **Liquidity Coverage Ratio** increased to **193.6%**, and **Leverage Ratio** stood at **12.1%**.

II. Management's Discussion & Analysis

On this report there are references to recurring figures related to usual business activities adjusted for the effect of the non-recurring income presented in 1Q19 resulting from the dissolution of Banorte USA, the additional provisions, and early write-offs related to COVID-19.

For comparison purposes, it is important to consider that GFNorte holds a 98.2618% ownership of the Bank; therefore, some figures may vary as they refer to the Group or the Bank.

Net Interest Income (NII)

NII excluding Insurance and Annuities was marginally up 0.1% in the quarter driven by a slight (0.7%) decline in net interest income from the loan portfolio. Nevertheless, NII was also impacted by a relevant (23%) decline in interest expense due to the combined effect of lower interbank loans, 6% higher demand deposits, a (2%) reduction in time deposits, coupled with the (75bps) decline in Banxico's reference rate during the quarter, which altogether yielded lower funding costs for the bank. Additionally, the **NIM from the loan portfolio** declined (17bps) closing at **7.9%** from 8.1% in the previous quarter; whereas, the **adjusted NIM excluding Insurance and Annuities** dropped (13bps) to **5.2%**, despite the reference rate dropping (75bps) in the period.

Compared to 9M19, **NII excluding Insurance and Annuities** rose **4%** driven by a **4% increase in interest from the loan portfolio** despite the strong (233bps) reduction in the average reference rate TIE 28d, which went from 8.5% to 6.1%. The rate cut was also reflected in funding cost efficiencies, which together with higher interest income, translated into a 12bps improvement in the **NIM from the loan portfolio** reaching **8.1%** in 9M20. **NIM excluding insurance and annuities** declined (11bps) to **5.4%** in the same period.

NII from **insurance and annuities**, had a (4%) quarterly decline. The **technical result of the Insurance business rose 1%** due to reserve accruals and **lower claims**, compensated the lower Premiums income. Consequently, and given the drop in Interest Income, **Insurance Net Interest Income (NII) declined (12%)**. The **Annuities** company had **29% higher NII** vs. 2Q20, while its technical result was mainly affected by Ps 4.69 billion higher technical reserves as a result of the inflation update, as well as by 9% higher claims, but offset by a 50% growth in premium income. Moreover, interest income of the Annuity company rose Ps 3.75 billion on asset revaluation.

Compared to 9M19, **NII from insurance and annuities increased 7%**, explained by the combined effect of 12% growth in premium income, 46% increase in net interest income, 35% expansion in technical reserves, and 13% higher claims.

Altogether, GFNorte's **net interest income remained stable during the quarter** and **showed a relevant 2% increase in the year**. Amidst a lower interest rate context, **NIM dropped (18bps) during the quarter**, and (61bps) vs. 3Q19, ending at **5.1%**; in 9M20, NIM was down (17bps) reaching 5.4%.

Loan Loss Provisions

The quarter presented multiple effects on provisions such as the positive performance of the loan portfolio, the effect of the support programs granted to individuals and SMEs, and the slight economic recovery with improved unemployment rates; thus, reflecting a lower provisioning level as anticipated.

Consequently, **provisions were down (63%) compared to the previous quarter**, when advanced provisions were generated. Out of the Ps 3.14 billion provisions registered in the quarter, 35% were related to new loan origination, and the rest to risk variations and portfolio changes. In the commercial portfolio, there was a Ps (2.31) billion decline, out of which: Ps (979) million correspond to medium-sized companies, and Ps (691) million to commercial and SMEs; both portfolios had early write-offs in the previous quarter. The corporate portfolio had a Ps (463) million decline due to lower loan origination, while the government book had a Ps (178) million decline on reserves releases. In the consumer portfolio, only in payroll did we see an increase of Ps. 624 million; thus, returning to its normal growth trend, considering that in 2Q20 this portfolio was positively impacted by an adjustment in the risk calculation methodology, along with lower requirements derived from the adjustment in the reserves code during 2Q20. Mortgages had a Ps (144) million decline, auto Ps (167) million, and credit card Ps (70) million. Altogether, loan loss provisions for the consumer portfolio rose Ps 237 million during the quarter.

Compared to 9M19, accumulated provisions in 9M20 increased by 38% mainly due to the anticipated provision effect from 2Q20.

Credit Provisions	4,118	8,456	3,138	(63%)	(24%)	11,582	15,938	38%

It is important to highlight that the Bank has a well-diversified loan portfolio, with 20% stake in the government portfolio, 24% in the commercial portfolio and 18% in the corporate portfolio. The corporate segment has less relative exposure to vulnerable sectors such as hotels and shopping malls, and no exposure to the airline industry. Additionally, regarding other corporate loans, Banorte has guarantees from development banks and federal participations in infrastructure projects. Furthermore, the bank's 23% share of the mortgage portfolio remains sound and on average has a low loan-to-value ratio. The consumer segment holds a 15% market share; where payroll loans are primarily granted to employees in financially-sound companies and state governments. The rest of consumer loans have relatively sounder vintages thanks to the efforts carried out in the origination and credit risk assessment processes, in addition to the implementation of internal loan provisioning models authorized by the regulator (CNBV) for the commercial, credit card, and auto loans portfolios, allowing us to be more efficient in provision requirements.

Cost of risk for the quarter was 1.56%, down (268bps) vs. the previous quarter, and (59bps) lower annually. Accumulated cost of risk for 9M20 reached 2.68%, 68bps higher vs. 9M19 explained by the general anticipated provisions booked in 2Q20.

1) Includes fees from letters of credit, transactions with pension funds, warehousing services, financial advisory services, and securities trading, among others.

Fees charged on services rose 6%, reverting the low transaction volume of previous months derived from the pandemic. Recovery is more evident in services such as electronic banking, debit cards, affiliated businesses, and mutual funds. Compared to 3Q19, fees charged on services were down only **(4%) in the year**, still reflecting deterioration in the economic activity resulting from the pandemic. The items driving the decline were mainly lower income from commercial credit line usage fees and credit cards, as expected. With accumulated figures for 9M20, the result was down (1%).

Fees paid on services were up 12% compared to the previous quarter, driven by higher interchange fees on the back of the recovery in economic activity, and higher fees for new loan origination and debt issuances. Compared with 3Q19 figures, there was a **(5%) contraction** linked to significantly lower insurance fees. Aggregated results for 9M20 showed a (1%) decline driven by lower insurance fees.

Altogether, **net service fees were up 1%** vs. the previous quarter, and down (3%) vs. 3Q19. With aggregate figures for 9M20, net service fees declined (2%).

*The concepts of Sólida and Arrendadora y Factor, now merged, previously registered in "Other operating income (expenses)" were reclassified in 3Q19 towards "Provisions for Loans": a) "Recovery of Loan Portfolio", and b) "Release of Provisions"; for comparison purposes they are reclassified retroactively.

Other Operating Income (expenses) declined (42%) in the quarter reaching a normalized level of **Ps 656 million**, driven by lower insurance income and excluding the positive effect of recoveries and tax credit benefits during 2Q20. Compared to 3Q19, results were down (9%), in line with the trend observed in the previous year. The sharpest decline is related to leasing revenues and income from other recoveries.

Compared to 9M19, Other Operating Income (expenses) showed a (40%) decline as a result of the recognition of Ps 1.66 billion in additional income due to the conversion effect of Banorte USA during 1Q19, and Ps (115) million lower Leasing Income. Excluding the latter effect, the recurring figure for 9M20 **increased 14%**, driven by income from other recoveries and tax credits during 2Q20.

As a result of the increase in loan loss reserves registered in 2Q20, **Net Operating Income grew 50%** during the quarter, reaching levels 1% above those reported in 3Q19. Whereas, in 9M20, the annual increase amounts to 5% with recurring figures, and (13%) with reported figures.

Taxes were up 69% during the quarter and down (16%) using recurring accumulated figures for 9M20, returning to the normal behavior observed in previous quarters without the effect of additional provisions.

Reported **net income** for the period went from Ps 6.52 billion to **Ps 8.91 billion in 3Q20**, 37% higher compared to the previous quarter, mainly explained by the anticipated provisions in 2Q20 that aggravated the result already affected by lower economic activity caused by the pandemic. Net income **compared to 3Q19 increased 1%**. Using aggregate **recurring figures for 9M20, net income rose 6%** (adjusting for the extraordinary income of Banorte USA in 1Q19 and the additional provisions in 2Q20), and using reported figures, it declined (11%).

Earnings per share for the quarter were **Ps 3.09**, while in **9M20** totaled **Ps 8.51**.

Amidst an uncertain environment caused by the COVID-19 pandemic, coupled with a slight recovery of economic activity, and aided by ongoing support programs for consumer and SME clients, the performing loan portfolio **grew 1% quarterly** and **9% annually** with positive results in almost every segment, except for credit card as anticipated.

Year-to-date, there has been a 9% growth in the performing portfolio, mainly driven by Corporate and Commercial loans, which grew 18% and 12%, respectively, as companies drew their lines of credit to overcome the pandemic. Compared to 3Q19, the consumer portfolio shows a 6% increase, primarily driven by a resilient 10% growth in mortgages, 6% in auto loans, a slight (1%) contraction in credit cards, and flat growth in payroll; thus, maintaining a 15.2% market share in consumer and mortgages.

Market share position (using CNBV records as of August 2020):

- **Mortgages:** Banorte showed a **9.5%** annual growth, slightly above that of the banking system, holding a 19.5% market share, keeping the **second place within the industry**.

- **Auto Loans:** Despite an industry-wide reduction in new car sales, Banorte holds 18% market share, **ranking second** in the segment and **growing 4.1%**, above the banking system at **1.4%**.
- **Credit Cards:** The portfolio had a (1.2%) contraction compared with the system's (7.7%) decline. Banorte is the **growth leader**, and holds a 10.5% market share, up 70bps during the period.
- **Payroll Loans:** After a deceleration period which reached negative growth rates, the portfolio reverted its trend growing 3.0% annually and a moderate 0.5% in loan origination. Banorte **ranks second** with a 20.2% market share.
- **Commercial:** The portfolio shows a 13.5% annual increase, favored by a timely approach to support customer's liquidity needs, and benefited by lower prepayments in the portfolio. Banorte's 10.8% market share in the commercial portfolio (including corporate and SMEs according to the CNBV classification), rose 15bps in the last 5 months, ranking fourth in the system.

The **SMEs performing loan portfolio** had a 9% quarterly increase, up **Ps 3.14 billion** vs.2Q20. Compared to 3Q19, it increased 15% partially explained by the support programs for clients granted after a rigorous risk selection process amidst an uncertain market. The NPL ratio declined (178bps) in the quarter reaching 1.94%, as result of the performance of clients coming out of their support programs between July and September.

- **Corporate Loans:** The portfolio reached an ending balance of **Ps 146.63 billion**, (2%) down vs. the previous quarter, driven by a quarterly increase in prepayments; nevertheless, it had a **strong 18% annual growth**. GFNorte's corporate loan book is well diversified by industry and by regions, showing low concentration risk. The 20 main private sector corporate borrowers accounted for 11% of the group's total portfolio. The group's largest corporate exposure represented 1.1% of the total performing book, whereas number 20 represented 0.4% of it. Out of these 20 borrowers, all 20 companies have an A1 rating.
- **Government Book:** Loan portfolio had a marginal decline during the quarter, totaling **Ps 162.61 billion**, derived from sound credit origination but offset by prepayments in States and Municipalities. Compared to 3Q19, the portfolio **recovered with a 3% growth**, reverting the intense competition observed in 2019 that caused a reduction in bid allocations of these loans, given the very low margins implied in the winning bids.

GFNorte's government portfolio is well diversified by regions, showing adequate concentration risk given that 34% of the portfolio is Federal Government exposure. Additionally, regarding municipal and states government loans, 89.7% of the loans are backed by fiduciary guarantees. GFNorte's market share as of August 2020 for this segment was 29.8%, **ranking first in the market**.

- **Infrastructure:** Due to the prevailing conditions in Mexico and abroad, this segment reflected quarterly stability. However, **during the year, the infrastructure book grew 17%**, up by Ps 7.10 billion on growing demand in this segment.

Past Due Loans

There is a significant improvement in asset quality, **past-due portfolio declined (28%)** compared to the previous quarter, mostly explained by the deferred payment support program. Likewise, compared to 3Q19, there is a sharp decline in the corporate and commercial portfolios in addition to the anticipated Ps 4.62 billion write-offs in the commercial portfolio registered in 2Q20, bringing the past due loan portfolio down **(54%)**.

Notes:

- Figures for reserve creation and rating are as of September 30th, 2020.
- The loan portfolio is rated pursuant to rules issued by the CNBV, in Chapter V, Second Title of General Provisions Applicable to Credit Institutions, and it can also be rated according to internal methodologies authorized by this same regulator.
The Institution uses regulatory methodologies to rate all credit portfolios. The Institution uses internal methodologies authorized by the CNBV according to the following: for the Revolving Consumption portfolio as of January 2018, for the Auto (Individuals) portfolio as of January 2020, and for the portfolio commercial of borrowers with sales or income greater than or equal to 14 million UDIs, from January 2019 in the Banco Mercantil del Norte subsidiary and from February 2019 in the subsidiaries Arrendadora and Factor Banorte and Sólida Administradora de Portafolios.
The Institution uses risk ratings: A1, A2, B1, B2, B3, C1, C2, D and E to classify provisions according to the portfolio segment and percentage of the provisions representing the outstanding balance of the loan, and which are set forth in Fifth Section of the "Reserve creation and their classification by degree of risk" contained in Chapter 5, Second Title of the aforementioned regulation.
- The complementary reserves established follow the general provisions applicable to credit institutions and consider the additional reserves, anticipating portfolio impairment effects due to COVID-19 previously described in "Loan Loss Provisions".

Based on B6 Credit Portfolio criterion from the CNBV, **Distressed Portfolio** is defined as the pool of commercial loans unlikely to be recovered fully, including both principal and interest pursuant to terms and conditions originally agreed upon. Such determination is made based on actual information and data, and on the loan review process. **Performing loans and past-due loans** are susceptible of being identified as Distressed Portfolios. The D and E risk degrees of the commercial loan rating were as follows:

Additionally, there was a Ps 1.19 billion gain from valuation of available-for-sale securities, and a (Ps 280 million) decline in valuation of cash flow hedging instruments, as result of market volatility.

Recent Events

1. SOLIDA ADMINISTRADORA DE PORTAFOLIOS MERGES WITH ARRENDADORA AND FACTOR BANORTE

On July 1st, 2020, the merger of Sólida (merging and subsisting entity) and Arrendadora (merged and extinguished entity) took effect. Additionally, Sólida changed its name to Arrendadora y Factor Banorte, S.A. de C.V., SOFOM, E.R., Grupo Financiero Banorte. The Financial Group's share in the capital stock of the merging company is 99.9058%.

2. CARLOS HANK GONZÁLEZ, CHAIRMAN OF GRUPO FINANCIERO BANORTE, PARTICIPATED IN THE INTERNATIONAL PANEL "PRINCIPLES FOR RESPONSIBLE BANKING: ONE YEAR ON" TO CELEBRATE THE FIRST ANNIVERSARY OF THE PRINCIPLES OF RESPONSIBLE BANKING OF THE UN.

On September 22nd, 2020, a year after the worldwide launch of the UN Principles for Responsible Banking and under the European Forum for Sustainable Investments, Carlos Hank González, Chairman of the Board of Directors of Grupo Financiero Banorte, stated that post-pandemic global economic recovery shall be based on sustainable development.

During his participation in the panel "Principles for Responsible Banking: One year on", Hank González analyzed the impact of the COVID-19 pandemic on the economy and considered that the financial sector will be key in the recovery as long as it incorporates the environmental, social and corporate governance (ESG) dimensions.

3. THE GOVERNMENT OF QUINTANA ROO AND BANORTE INSURED SOME OF THE STATE'S BEACHES AND REEFS

Seguros Banorte signed a contract with the government of Quintana Roo for a policy that protects the beaches and reefs of 5 municipalities in the state against possible hurricanes. This insurance has a coverage of up to 42.5 million pesos per event, which would allow rapid restoration of the affected area to offset the hurricane damages and mitigate the impact on the local economy.

The policy was reinsured by Hannover Re, the third largest reinsurer in the world, and was structured by Global Parametrics, an international firm specialized in designing financial solutions to mitigate the impact of natural disasters.

Changes vs. the previous quarter

Net interest income (NII) was stable during the quarter, with NII from the loan portfolio slightly below 2Q20, but with a relevant decrease in the cost of funds. With this, **NIM resiliently stood at 5.8%**, despite the current monetary policy conditions of low interest rates.

Non-interest income declined (13%) mainly driven by normalized trading income and other income.

Fees charged increased 7% driven by the recovery of electronic banking services from affiliated businesses and credit card fees. Similarly, **fees paid** increased 15% due to higher exchange fees in the acquiring business. In sum, **net fees** reflect a **2% growth**, derived from a gradual economic recovery.

The **trading income decreased (26%)** in the quarter, due to lower market volatility; thus, returning to its normal levels following a high-income quarter, particularly on F/X trades and derivatives. **Other operating income (expense)** declined Ps (366) million or (53%) on the quarter due to lower recoveries and tax credits, which generated a favorable, but atypical effect in 2Q20.

Non-interest expense rose 3%, due to higher administrative and promotional expenses, as well as consulting services. Consequently, **efficiency ratio** closed at **44.6%** from **42.2%** in the previous quarter.

Provisions were down (63%) in the quarter, returning to the last year's levels. This change is explained by a (91%) decline in the requirements in the commercial portfolio, out of which Ps (972) million were due to declines in the mid-size company portfolio, Ps (701) million in the commercial portfolio, Ps (463) million in corporate, and Ps (213) million in state and municipal government; whereas, federal government grew Ps 36 million. In the consumer portfolio, provisions rose 6%, mainly due to a Ps 548 million increase in the payroll portfolio due to updated inputs for greater precision in risk measurement, in addition to lower requirements due to an adjustment in the reserves code made in 2Q20; thus, returning to a normalized trend in 3Q20; moreover, requirements for auto loans declined Ps (167) million, mortgages Ps (144) million and credit cards Ps (70) million.

NIM adjusted for credit risks recovered to **4.7%**, 179bps higher vs. **3.0%** in 2Q20.

Altogether, **net income** was **up 81%** or Ps 2.96 billion; thus increasing **ROE** which returns to committed levels at **21.1%**, **up 863bps**. Similarly, **ROA rose 91bps ending the quarter at 2.0%**. These results reflect the strong commitment to maintain profitability amidst a challenging environment.

Accumulated changes vs. the previous year (9M19)

Net interest income for 9M20 grew 3% in the year, despite the sharp drop in reference rates, but offset by the strategy to improve the funding cost and a 9% growth in the loan portfolio. **NIM remains resilient at 6.0% with a contraction of only (31bps)** compared to 9M19 regardless the sharp drop in rates.

Recurring non-interest income was down by (3%) compared to 9M19 driven by a Ps (415) million decline in trading income and a Ps (374) million reduction in net fees, while recurring other operating income (expense) rose Ps 380 million due to lower losses and impairment of assets. **Reported non-interest income** declined (12%) due to the effect of extraordinary income from the liquidation of Banorte USA in 1Q19 in other operating income.

Fees charged for 9M20 declined (1%), due to lower fees from consumer loans, while **fees paid increased 3%** due to higher activity in the acquiring business. In sum, **net fees were down (4%)**.

Trading income decreased (11%) due to lower trading activity in securities, derivatives and F/X. Reported **other operating income (expense)**, was down (55%) because of the recognition of extraordinary income in 1Q19. With **recurring figures**, the effect is positive, showing a **58% growth** due to a significant decline in losses and estimates, coupled with lower asset impairments.

Non-interest expense was up by only 3.0% vs. 9M19, mainly reflecting a Ps 984 million increase in rents, depreciation and amortization. Altogether, **efficiency ratio** rose 174bps to **43.5%**.

Provisions increased 40% or Ps 4.52 billion compared to 9M19 explained by a Ps 3.11 billion increase in the provision requirement from the commercial portfolio, comprised of a Ps 2.26 billion provisions increase in the commercial, corporate and mid-size portfolios associated with loan origination in those portfolios, in addition to the requirement for advance provisions made during 2Q20, while provisions for the government portfolio declined Ps (810) million. Provisions for the consumer portfolio, were down Ps (1.46) billion, due to lower provisioning requirements in most of its constituents, except

for the mortgage portfolio, which had Ps 220 million higher provisions driven by higher loan origination. **NIM adjusted for credit risks** stood at **4.2%**, down by (72bps) vs. 4.9% in 9M19.

Reported Net income reached Ps 16.48 billion, down (20%) vs. 9M19, and up 2% when comparing recurring figures, that is, excluding the extraordinary income from 1Q19 and anticipated provisions in 2Q20. In terms of profitability, **ROE** reached **18.3%** down (600bps) vs. 9M19, while **ROA declined (62bps)** to **1.7%**, both ratios impacted by the anticipated provisions in 2Q20, as well as by the challenging economic conditions derived from the pandemic.

Capital

Shareholders' equity totaled **Ps 129.44 billion**, up 6% vs. the previous quarter driven by: a Ps 6.63 billion net income increase; Ps 203 million expansion in share sale premiums; an Ps (805) million decline in retained earnings from interest paid on subordinated obligations; Ps 1.20 billion capital gain on valuation of available-for-sale securities, and Ps (284) million decline in valuation of cash flow hedging instruments.

Regulatory Capital (Banco Mercantil del Norte)

Banorte has fully adopted the capital requirements established to date by Mexican authorities and international standards, so-called Basel III, which came into effect in January 2013.

In June 2020, Banorte was confirmed as Level II - Systemically Important Financial Institution, which implies that Banorte must maintain a 0.90 pp capital buffer. Therefore, **starting on December 2019, the minimum Capital Adequacy Ratio required for Banorte amounts to 11.40%** (corresponding to the regulatory minimum of 10.5% plus the 0.90 pp capital supplement).

(*) The reported capitalization ratio of the period is submitted to the Central Bank of México.

At the end of 3Q20 the estimated Capital Adequacy Ratio (CAR) for Banorte was **21.12%** considering credit, market, and operational risks; and 27.65% considering only credit risks. Moreover, Total Tier 1 Capital reached 13.74% as of 3Q20. Excluding the effect of additional reserves generated in June 2020, 3Q20 CAR would have been 21.27% with Total Tier 1 Capital of 14.10%.

CAR rose 1.46 pp vs. 2Q20 when incorporating the effect of additional reserves, when excluding it, CAR would reflect a 0.15 pp benefit reaching 21.27% due to the following effects:

	With Additional Reserves	Without Additional Reserves
	+ 1.46 pp	+ 1.61 pp
1. Net Income in 3Q20	+ 1.11 pp	+ 1.11 pp

CAR increased 0.79 pp vs. 3Q19 when considering the additional reserves effect, but excluding this effect, CAR would reflect a 0.15 pp benefit due to the following effects:

	With Additional Reserves	Without Additional Reserves
	+ 0.79 pp	+ 0.94 pp
1. Net Income growth	+ 2.96 pp	+ 2.96 pp

* Including the mark-to-market valuation effect on Capital Notes, and the buyback effect (BINTER: Mar'20 / Tender Offer Oct'19 y Dec'19)

** Includes fixed rate hedging derivatives

Excluding the Special Accounting Criteria authorized by the CNBV for the COVID-19 contingency, total Capital Adequacy Ratio would have totaled 21.03%, with Core Equity Tier 1 at 13.66.

Evolution of Risk Assets

In compliance with the capitalization requirements established to date by the Mexican authorities and International Standards Basel III, Banorte classifies its Risk Assets as Credit, Market, and Operational, which are actively managed by the Institution to monitor its quality.

The Total Risk Assets as of September 2020 reached Ps 904.54 billion, up Ps 13.08 billion vs. the end of June 2020, and Ps 128.90 billion above September 2019.

The evolution of Risk Assets is presented below:

Risk Assets (Million Pesos)	3Q19	2Q20	3Q20	Change

Total	775,642	892,361	904,544	1.37%	16.62%

Main quarterly changes in RWA:

- Decline in Credit Risk Weighted Assets (Loan Portfolio) driven by decreases in the Corporate and Government loan portfolios (States and Municipalities), as well as by lower liquid assets due to Balance Sheet management.
- Decline in Credit Risk Weighted Assets (Others) driven by the Credit Valuation Adjustment requirement for derivative transactions, explained by the evolution in market rates in these positions as the derivative rate curve had 10pb quarterly increases in the terms of up to 7 years decreasing exposure in operations with clients hedging upward interest rate risk, and consequently, capital requirements.
- Increase in Market Risk Weighted Assets mainly due to variations in foreign currency exchange and changes in the Balance Sheet structure.

Main annual changes in RWA:

- Increase in Credit Risk Weighted Assets (Loan Portfolio) in line with Bank's total loan portfolio growth, worth highlighting mortgage, corporate and commercial portfolios growth.
- Increase in Credit Risk Weighted Assets (Others) driven by the Credit Valuation Adjustment requirement for derivative transactions, which due to the accumulated decline in derivative rate curves during the year (213) bps on average across the curve has increased the exposure to clients hedging upward interest rate risk, and consequently increasing capital requirements.
- Increase in Market Risk Weighted Assets mainly due to variations in foreign currency exchange and changes in the balance sheet structure.

Interest income (Net) was down (38%) **sequentially**, and compared to accumulated 9M19 figures, it **rose 13% annually**, explained by the valuation of investment assets.

During the quarter, Premium Income (Net) declined **(34%)** due to policy renewals in 2Q20. The Technical Reserves had a sharp decline on the back of lower premiums issued during the quarter and reserve accruals.

Furthermore, there is a slight (10%) decline in claims during the quarter, mainly driven by lower claims in life policies with savings components compared to the previous quarter, and a reduction in claims in the auto segment.

At the end of 3Q20, **technical result** of Seguros Banorte was **Ps 1.35 billion**, **1%** higher in the quarter as a result of lower premium income due to the typical seasonality of the quarter, but offset by the release of reserves by the ongoing accrual rate of the business, and lower claims vs. the previous quarter.

Compared to 9M19, **technical result fell (2%)** despite an 8% increase in premium income, there was also an increase in technical reserves and greater claims in life and health insurance segments.

Acquisition Costs were **up 7% quarterly**, totaling Ps 555 million; while compared to 9M19, they were **down (18%)** as there was a Ps 331 million reinsurance cost in 3Q19 from variations from the estimated claims in the life portfolio. The quarterly change resulted from seasonal variations in premiums sold.

Net Operating Income amounted to **Ps 1.06 billion during 3Q20**, down **(20%)** vs. the previous quarter, as result of **(12%)** lower interest income.

Net Income for the quarter was **Ps 1.20 billion**, down **(22%)** vs. **2Q20**, and **8%** higher than the accumulated net income of 9M19.

Quarterly **Net Income** for Seguros Banorte, excluding its subsidiary Afore XXI Banorte, totaled **Ps 745 million**, accounting for 8.4% of GFNorte's net income on 3Q20.

ROE for the **Insurance business** declined annually and stood at **30.3% in 3Q20**.

During 3Q20, **net interest income** reached Ps 4.08 billion, a **relevant increase** against the previous quarter due to the Ps 3.50 billion UDIs valuation effect during the quarter. Compared to 9M19 it was up 55% primarily driven by the valuation effect, and to a lower extent by the increase in interest income.

Technical results were down during the quarter due to the combined effect of higher Premium income, higher technical reserves due to the inflation update effect, and a 9% increase in claims. Compared to 9M19 there is a (71%) decline in the technical result generated by Ps 3.08 billion higher reserves, in addition to 16% higher claims or Ps 818 million, which could not be offset by the Ps 1.25 billion growth in premiums issuance.

Net Income from Pensiones Banorte **declined (20%) over the quarter**, driven by Ps (144) million lower Other Operating Income on the acquisition of SURA's annuities portfolio in 2Q20. Compared to **9M19**, net income **rose 38%** driven by a greater variation in the financial result related to the decline of the technical result, both due to higher inflation and the increase in other operating income.

Net income from Pensiones Banorte during 3Q20 represented 3.8% of the Financial Group's net income.

ROE for the quarter stood at **23.6%**, and **25.9% in 9M20**, up 2pp annually.

Accounting & Regulatory Changes

Numbers in this section are stated in million pesos.

Main changes in the accounting criterion NIF D-3 "Employee Benefits".

On December 31st, 2015, the CNBV issued a resolution amending provisions corresponding to the application of the "NIF D-3 Employee Benefits". This provision is intended to publicize transitory articles that identify the options that institutions must recognize accounting effects as a result of the new NIF-D-3.

Under the above, the Group took the option set forth in the third transitional article; consisting of progressively registering in equity the formula changes referred to in paragraphs a) and b) of paragraph 81.2 of the NIF D-3 "Employees' Benefits", issued by the "Consejo Mexicano de Normas de Información Financiera, A.C.", which became effective on January 1st, 2016 and promptly reported to the CNBV in accordance with the deadlines set in the provisions.

The registration of balances in paragraphs a) and b) of paragraph 81.2 of the NIF D-3, started in 2016 recognizing 20% of the balances in that year and an additional 20% in each of the subsequent years, up to 100% in a maximum period of 5 years.

The total amounts to register regarding paragraphs a) and b) of paragraph 81.2 of the NIF D-3 were determined using the corporate bond discount rate for market valuation, of the Defined Benefits Obligation in accordance with the new NIF D-3, in the following terms:

- I. The amendments balance of the unrecognized plan, is recognized progressively, registering 20% annually the "results from prior years" line, using as a counterpart the "Provision for employee benefits" account, corresponding to the liability line "Other creditors & accounts payable", as follows:

Discount rate	Total balance to be applied	20% annual application	Progressive recognition as of 3Q20
Corporate bonds	\$183.0	\$36.6	\$173.8

- II. In the case of an accumulated balance of gains or losses of the unrecognized plan (broker approach), its perceived progressively, registering 20% in 2016, and increasing the "Provision for employee benefits" account, corresponding to the liability line "Other creditors & accounts payable", using as a counterpart the "Measurements of defined benefits for employees" of the "Earned Capital" line as follows:

Discount rate	Total balance to be applied	20% annual application	Progressive recognition as of 3Q20
Corporate bonds	\$2,427.8	\$485.5	\$2,366.6

The 20% annual application is registered proportionally each month in 2020.

The amounts that would have been registered and presented in the balance sheet as of September 30th, 2020, had the option in the affected lines not been implemented are:

Other creditors & accounts payable ⁽¹⁾	40,836
Total liabilities	1,578,005
Results from prior years	119,725
Measurements of defined benefits for employees	(2,021)
Total equity	217,300
Total liabilities plus equity	1,795,235

1. Under this line, the "Provision for employee benefits" account is netted to show "Net assets for defined benefits" driven by the institutions' prepayments. (if the balance were negative, this would be presented under Different creditors and other accounts payable).

Early termination of support programs for mortgage loan debtors

On June 30th, 2010, the Federal Government, through the SHCP (Tax Authority), and Credit Institutions, signed an agreement to early terminate support programs for mortgage loan debtors; therefore, as of January 1, 2011, the Holding entity absorbed the discount that was early-applied to mortgage loan debtors that were enrolled in the program.

The agreement established a set of payment obligations by the Federal Government which were payable in 5 equal annual amortizations ending on June 1, 2015, on which Banorte received Ps 29 million, including monthly interest from the day after the cutoff date until the ending month before the payment date.

As of September 30th, 2020, the remaining balance of CETES ESPECIALES which have not been repurchased by the Federal Government amounts to Ps 586 million, with maturities between 2022 and 2027.

Special accounting treatment of the support programs granted by the Institution derived from the COVID-19 Contingency

Given the negative impact generated in various activities of the economy derived from the SARS-CoV2 (COVID-19) virus epidemic in Mexico, the Institution has decided to support its clients by implementing various support programs that will be applicable to all customers who enroll into the program from March 25th through July 31st, 2020, according to the following:

Credit card:

- The support consists of voiding the monthly minimum payment of the card for 4 months, without affecting the individual's credit bureau record, nor charging collection expenses or late payment fees; this will be valid upon receipt of an e-mail confirmation of successful enrollment in the program.
- The normal payment requirement will be the month immediately after the end of the support period, that is, August 2020.
- The balance held in the account during the support period will accrue ordinary interest that will be calculated monthly, which will be informed to the client, but not capitalized.
- Payments will be allowed at any time.
- Credit cards enrolled in the support program remain available for purchases and cash withdrawals pursuant to the applicable credit policies and the current terms and conditions.

Payroll loans:

- Program consists of postponing payment of principal, interest, insurance, and fees equivalent to 4 months, depending on payment frequency.
- The deferral applies upon e-mail confirmation of successful enrollment in the program.
- At the end of the support period, payment requirements will be resumed in the same amount as before the program.
- The client will not pay additional interest during the program or the extension of the term.
- Advance payments are allowed at any time without penalties if customers wish to conclude their loan payments on the original date.

Personal loans:

- Program consists of postponing payment of principal, interest, insurance, and fees equivalent to 4 months, depending on the frequency of payment.
- The deferral applies upon e-mail confirmation of successful enrollment in the program.
- At the end of the support period, payment requirements will be resumed in the same amount as before the program.
- The client will not pay additional interest during the program or the extension of the term.
- Advance payments are allowed at any time without penalties if customers wish to conclude their loan payments on the original date.

Auto loans:

- Program consists of deferring principal and interest payment on the loan for the following 4 months after receiving email confirmation of successful enrollment in the program.
- The 4 monthly payments will be appended to the end of the original term.
- The normal payment will be resumed immediately after the end of the deferral period.
- Accrued interest during the 4-months period will not generate any additional interest or fees.
- Advance payments are allowed at any time without penalties if customers wish to conclude their loan payments on the original date.

Mortgage loans:

- Program consists of deferring principal and interest payment on the loan for the following 4 months after receiving email confirmation of successful enrollment in the program.
- The 4 monthly payments will be appended to the end of the original term.
- The normal payment will be resumed immediately after the end of the deferral period.
- Accrued interest during the 4-months period will not generate any additional interest or fees.
- Advance payments are allowed at any time without penalties if customers wish to conclude their loan payments on the original date.

SME loans:

For term-loans:

- Support consists of not requiring monthly payment (principal and interest) for up to 4 months
- Deferred installment will be appended to the end of the original term.
- Loans close to the end of their term, will be extended for up to 4 months.

For revolving loans:

- Support consists of not requiring the monthly interest payment for up to 4 months and at the same time the credit term will be extended for up to 4 months.
- Interest is appended to end of the term.
- Making full or partial payment of the principal at the end of the original term or during the life of the loan, does not exempt the client from paying the deferred interest.
- The credits that are about to end will have an extension of the term according to the remaining months and the payment of the principal will be sent forward to the new end date.
- During the extension of the term, the corresponding interest payment must be covered according to the requirements set forth in the loan agreement.

By virtue of the foregoing, on March 27, 2020 (through official letter P285 / 2020), and on April 15, 2020 (through official letter P293 / 2020) and through the communication of June 26, 2020, the National Banking and Securities Commission (the "Commission"), issued Special Accounting Criteria, applicable to the Institution for the period of February 28, 2020 and until July 31, 2020, by which it authorized that those credits in force as of February 28, 2020, and the credits granted in March 2020, according to paragraph 12 of criterion B-6 "loan portfolio" (criterion B-6) to which the payment of principal and interest was deferred according to the program, are not considered as restructured loans in terms of paragraphs 79 and 80, likewise, if the requirements established in paragraphs 82 and 84 of Criterion B-6 are not applicable to them, as appropriate, and for them to remain as a current portfolio during the term agreed upon in said Program. Therefore, these credits are considered as a current portfolio for the determination of the preventive estimate.

Additionally, the loans for which payments will be deferred shall not be considered as restructured in accordance with the provisions set forth on paragraph 40 of Criterion B-6, nor shall they be reported as past due loans to the credit information entities.

The amounts that would have been recorded and presented both in the balance sheet and in the income statement by type of portfolio, had this special accounting criteria not been applied, as well as the details of the items and amounts by type of portfolio affected by accounting due to the application of the special accounting criteria as of September 30th, 2020, are:

Internal Control

For Grupo Financiero Banorte, S.A.B. de C.V. (GFNORTE), internal control is a shared responsibility among all its constituents; therefore, the Board of Directors, other Corporate Governance entities, senior management as well as each one of its executives and employees are part of the Internal Control System (ICS).

ICS is the general framework set forth by the Board of Directors with the objective of reaching institutional objectives through policies, and control and monitoring activities and procedures, which have a positive impact on risk management, on the trustworthiness of financial information being generated, and on regulatory compliance.

ICS establishes the objectives and general guidelines which provide a framework to activities and responsibilities applicable to all the personnel in charge of origination, operational processing, and execution. Such activities are monitored by teams specialized in risk monitoring, and in mitigating controls.

ICS is structured around three defense lines:

- A. **First.** The owners of support and business processes, who are ultimately responsible for the primary internal control function in their activities.
- B. **Second.** Risk, Credit, Legal and Comptroller departments, which provide permanent control and monitoring support, and
- C. **Third.** Internal Audit, with the independence granted by its direct line of report to the Internal Audit and Corporate Practices Committee, supervises all activities and the adequate development of all functions across all areas.

At GNORTE we are convinced that having an adequate control environment is yet another competitive advantage that drives our growth and solid presence in the domestic financial market. Therefore, all executives and employees alike perform their daily activities with discipline, with strict adherence to the norm, and following a philosophy of getting things done right the first time, without having to rely on reviews that might be carried out by other areas.

During the third quarter of 2020, there was continuous development of activities related to strengthening control, risk evaluation and management, establishment and monitoring of controls, and quality of information assurance, highlighting the following:

- A. The various Corporate Governance Committees have had the required financial, economic, accounting and/or legal information for proper decision-making.
- B. The Corporate Governance documents related to Internal Control have been revised and updated and presented to the board through the CAPS for their approval.
- C. The policies and procedures manuals have been updated as per changes in external regulations, client support programs, new products, and changes in the Institution's processes or improvements to internal controls.
- D. The requests from different internal areas regarding internal control matters were addressed, both in support of the development of new institutional projects, as well as those that derive from regulatory changes.
- E. GFNORTE's business and operating support processes are constantly monitored through the Business Process and Management Comptrollers. They issue periodic compliance reports and identify areas of opportunity so that they can be remediated appropriately.
- F. Various activities regarding internal accounting control were established, in accordance with the work plan established at the beginning of the year.
- G. Effectiveness tests related to the Business Continuity Plan were carried out. In this matter, regarding the global contingency represented by COVID 19, the Continuity Plan was activated under its Pandemic section. The actions implemented have responded to the considerations of each moment and are consistent with the assessment of an incremental risk.
- H. There has been continuous follow-up of the improvement actions regarding the observations made by the different members of the SCI.
- I. The Information Security Officer (CISO) presented the Master Plan to the Management Team for its approval, and carried out its functions based on the mentioned Master Plan, reporting the findings and the details of the activities carried out to the General Director of GFNorte and to the Corresponding Corporate Governance Committees, maintaining a matrix coordination with the Comptroller as part of the SCI.
- J. The requirements of the Supervisory Authorities were answered, the obligation to inform required by the external regulation were fulfilled, and ordinary inspection visits are being attended.

Financial Situation and Liquidity

Internal and External Liquidity Sources

The main internal liquidity source comes from the various deposit products that the institution offers to customers, such as interest bearing and non-interest-bearing demand deposits, and time deposits.

Regarding external sources of liquidity, Banorte has diverse mechanisms to access the debt and capital markets. The Institution obtains resources through the issuance of debt securities, including subordinated debt, loans from other institutions including the Central Bank and international organisms. In addition, another liquidity source is repurchase agreements.

Liquid assets include investments in government securities and deposits held in the Central Bank and other foreign banks.

Important initiatives of Banorte's liquidity during 3Q20.

Banorte's liquidity strategy is aimed at maintaining adequate liquidity levels based on prevailing circumstances. In this sense, and given the current contingency, management decided to increase liquidity levels to face any contingency, specifically by:

- a) Reinforcing the quality of client deposits, with preference for stability and cost.
- b) In July 2020 Banorte issued 500MUSD of AT1 Perp NC10 Notes (Non-Fundamental Basic Capital) that not only underpin the Bank's Regulatory Capital, but also the liquidity levels of the financial institution.

In addition, it should be noted that Banorte has not used the Bank of México Central Bank Ordinary Facilities or Extraordinary Facilities during 3Q20.

Detailed information related to liquidity sources is reported in different headings of the GFNorte's Balance Sheet in this report.
